HAMMERHEAD
SMV
SUB SURFACE MULTI-MISSION VEHICLE

WWW.PATRIOT3.COM

Introducing the Patriot3 Hammerhead SMV. The world's first fully modular subsurface multi-mission vehicle. The Hammerhead can operate autonomously or by manual control. The system's modularity allows for full customization to fit a wide variety of manned and unmanned mission requirements.

Next Generation Autonomous Operating Propulsion Vehicle

MODULARITY

Patented Modular Design allows end user to customize vehicle to meet mission requirements and expand power capabilities

POWERFUL CONTROL

High-torque thrusters are capable of up to 400 lbs total thrust providing reliable control and agility in harsh maritime environments

NAVIGATION

Powerful navigation system provides full or semi-autonomous control, mapping, station keeping, doppler, sonar, GPS and object avoidance capabilities

ANCILLARY POWER

The Hammerhead control module contains a power accessory port providing up to 1000 watts of power for accessories

REDUNDANT POWER

Additional high performance Li-Ion battery modules can be added to increase power longevity and mission duration
