**CRRC
DEPLOYMENT
KIT**

WWW.PATRIOT3.COM

Patriot3 Maritime offers a full line of CRRC gear to outfit your Combat Rubber Raiding Craft. The Wing/ Zodiac crafts and Patriot3's CRRC Deployment Kit are the ideal combination for missions in which rapid deployment, high performance, and reliability are key assets for success in harsh maritime environments.

Patriot3 CRRC Gear is designed to fit all Wing P-Series and Zodiac Futura Commando Boats.

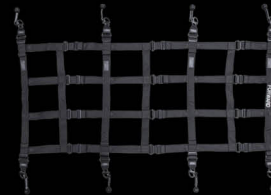

BOW BAGS

The Patriot3 Maritime Bow Bags provide durable and secure storage on board military inflatable boats. Each bag mounts to the boat's existing D-rings and is ideal for storing and accessing mission specific equipment. The integrated large MOLLE array can be utilized to increase the capabilities of each bag.

CARGO NET

The Cargo Net is an adjustable net designed to secure equipment and cargo when the boat is in motion. If capsized, the Cargo Net keeps the gear contained in the CRRC and prevents loss.

RIGHTING LINE

The Righting Line is designed to assist in Righting the CRRC if it becomes capsized. It contains 17ft of folded webbing attached to a carabiner that can be deployed in seconds. Four Righting Lines are included with each Cargo Net.

TOWLINE

The Patriot3 Towline allows safe, secure and speedy towing of your inflatable CRRC. This Towline pulls the CRRC from the transom and pontoon rears where the boat is less susceptible to damage. This allows for towing at faster speeds and eliminates the risk of ring tear-out which can cause severe damage to the CRRC.
